#### For Control of Mosquito Larvae Using ULV Application:

For ground application to terrestrial sites, apply at the rate of  $\frac{3}{4}$  - 1 ounce of product per acre to water-holding containers and other small bodies of water that breed mosquitoes. Use equipment capable of applying a fine mist or ULV. Follow equipment manufacturer's recommendations when making applications. Direct spray applications to sites where mosquitoes breed. These sites include tires and tire piles, potted plants, tree holes, garbage bins, cans, birdbaths, rain barrels, and other water-holding containers and small bodies of water. Reapply as breeding sites become reinfested or when monitoring indicates an increase in adult populations.
